

Bourgeoisie does not have a Chinese translation, so it cannot be picked as an anchor word even if it is the farthest word from the convex hull.

大都會 (dà dūhùi) is the point farthest away from the Chinese convex hull, but its translation **cosmopolitan** is too close to the English convex hull, thereby eliminating them as anchor word choices.

Forest and its translation **森林 (sēnlín)** are not the furthest points from their respective convex hull, but neither are too close. So, they are chosen as the next anchor words.
